ual: creative computing institute

Unit Assessment Brief

BSc (Hons) Creative Computing

Unit Title: Coding Three: Web Development Studio

Unit Leader: Marysia Tańska, m.tanska@arts.ac.uk	
Programme Administration Contact: cci.ug@arts.ac.uk	
Unit code: IU000112	
Unit credit: 20 credits	
Unit duration: Weeks 1-13	
Year / Level: 2/5	
Unit briefing date: 2 October 2025	

Unit introduction

In this unit, you'll dive into the basics of web development. In a field which has a new set of popular tools every three to six months, it’s critical to lay a proper foundation for quickly onboarding emerging techniques. You will learn HTML, CSS, and continue with JavaScript. The emerging and popular methods for using CSS and JavaScript on modern website will be explored and discussed. Integrating into a simple database, you will learn how to connect front end presentations with server-side applications. Animations in the DOM using JavaScript and CSS will be covered. In conjunction with technical skills, you will learn popular user experience design patterns and discuss considerations for accessible design.

Learning outcomes and assessment criteria

On completion of this unit you will be able to

LO1 Demonstrate an awareness of working with HTML, CSS framework, and JavaScript (Knowledge)

LO2 Discuss what makes for an effective and successful cross-platform User Experience (Enquiry)

ual: creative computing institute

LO3 Demonstrate the ability to include standardised elements of accessibility in web development (Realisation)

Assessment Criteria

Your work in this unit will be marked against the UAL assessment criteria, which are designed to give you clear feedback on your achievement. The full assessment criteria descriptions can be found on the UAL Assessment webpage.

ual:

Assessment Criteria | Level 5

	F	E	D	C	B	A
Enquiry Engagement in practice informed by critical analysis and evaluation of diverse relevant practices and ideas	Little or no evidence	Insufficient evidence	Satisfactory evidence	Good evidence	Very good evidence	Excellent evidence
Knowledge Evaluation of different perspectives and approaches to a range of practical, theoretical and/or technical knowledge(s)	Little or no evidence	Insufficient evidence	Satisfactory evidence	Good evidence	Very good evidence	Excellent evidence
Process Experiment and evaluate methods and results	Little or no evidence	Insufficient evidence	Satisfactory evidence	Good evidence	Very good evidence	Excellent evidence
Communication Demonstrating clarity and depth in relation to the communication of diverse intentions, contexts, sources, and arguments appropriate to your audiences	Little or no evidence	Insufficient evidence	Satisfactory evidence	Good evidence	Very good evidence	Excellent evidence
Realisation Selecting appropriate options and choices related to production of outcomes	Little or no evidence	Insufficient evidence	Satisfactory evidence	Good evidence	Very good evidence	Excellent evidence

What you have to produce

Portfolio: you will be expected to design and develop a an accessible, cross-platform website that will include your creative portfolio (100%)

This unit is assessed holistically (100% of the unit). There is no breakdown of grades for the different assessment evidence listed. Instead, the evidence is considered together and the tutors use their academic judgment to arrive at a grade for the unit as a whole. All components of the assessment must be submitted to pass the unit.

Further Information

A text file (.md, .txt., .docx, .pdf) with a link to an online repository including your portfolio website and documentation.

Requirements - repository contents:

- a link to the portfolio website published online.
- weekly tasks should be published as a part of the website. You're welcome to expand it with other creative projects if you'd like.
- all assets and source code for the website, apart from code libraries,
- a README file briefly describing the folder structure and contents,
- documentation of the ideation, design and development process for each of the weekly tasks, and the whole website.

Requirements - website:

- A personal & portfolio website including a short introduction to you and your work. If you'd rather not publish personal information, feel free to feature a fictional character instead.
- The website needs to include a collection of at least 1 relevant homework task per week as a part of the portfolio. Parts which do not require coding, such as a Figma design, can be linked either on the website or in the documentation.
- It needs to demonstrate your knowledge of HTML with good practice of semantic structure, CSS styling, and using JavaScript for interactivity and accessibility purposes.
- You need to integrate at least 1 JavaScript library in your website.
- The website needs to include accessibility features such as keyboard navigation, alt text, aria labels, customisable interface, etc.

Requirements - documentation:

- Accepted file types for documentation are .md and .pdf. MarkDown (.md) format is recommended, because:
- It's a standard documentation format in software development. You may find it helpful for future studies and work,
- Allows for quick editing and synchronisation, either in the browser or in a code/MD editor. You can import images from external files or copy-paste, include links, etc.
- Having your work online will make it easy to consult during in-class tutorials and Formative Assessment.
- You're welcome to use external services such as Canva or Notion throughout the term, as long as you submit it as a PDF or MD and publish to GitHub for the final assessment.
- It needs to include a section on the accessibility of your website:
- what accessibility features you included with references to relevant guidelines,

- a screenshot of accessibility evaluation using one of the browser plugins from class.
- A reflection of the accessibility of your website could be further improved, if applicable.
- You're encouraged to include notes, photos of hand notes and sketches, links to inspiration and learning resources used, reflections on the learning process, screenshots or videos of work-in-progress, and any other relevant resources.
- This does not have to be a polished document. Bullet-points, screenshots, hand notes, sketches and any other means of creative expression are highly encouraged.

Please note documentation of the development process will be an integral part of the final grade.

AI guidance

Each weekly task must include an AI disclaimer, as listed in the template. Any code fragments where you used AI need to have clear descriptions of how you used it, in a code comment above relevant section.

If using AI for formatting the code, please include a “before” screenshot.

Make sure to follow UAL Student Guide to Generative AI

Referencing guidance

Any learning materials and code sources which don't come directly from in-class demos need to be referenced with code comments and links.

For any further questions relating to Final Assessment please refer to the unit information on Moodle, or ask Marysia.

Submission information

Submission date and time:	**Holistic: Portfolio Website:** **Submission Deadline: Thursday 29th January 2026 by 2pm.**

Adjusted assessment submission date and time:	**Thursday 5th February 2026 by 2pm.** Adjusted Assessment (AA) is applicable to students with Individual Support Agreements. To confirm that you intend to use adjusted assessment, please email cci.ug@arts.ac.uk two weeks in advance of the standard deadline.

Submission method:	File submission via Moodle, maximum file size 1GB, acceptable file types: .md, .txt., .docx, .pdf

Anonymous marking:	**No:** It is not possible for this unit to be marked anonymously. However, all unit assessments are internally moderated to maintain fairness in assessment.

Date to expect feedback by:	**26th February 2026** You will receive feedback online via Assessment Feedback. Please note grades and feedback are indicative until confirmed following the Exam Board.

Submission queries:	Please contact cci.ug@arts.ac.uk in advance of the submission deadline.

Support

CCI and UAL has a range of services that can support you with your studies. Useful contacts for advice and guidance include:

CCI UG programme administration team : cci.ug@arts.ac.uk

CCI Academic Support Contact:	academicsupport@arts.ac.uk

CCI Disability Adviser Contact:	Caroline Huntley c.huntley@arts.ac.uk

CCI Subject Librarian Contact:	Benelia Salmon b.salmon@arts.ac.uk Kelli Staake k.staake@arts.ac.uk

UAL Language Centre: Offers tailored classes, 1-1 tutorials and speaking and writing workshops to help you with your studies.

Student Services: Find out about services including counselling, health advice, chaplaincy, disability and dyslexia support, and advice on funding and immigration matters.

Students Union: Arts SU offers impartial advice (independent from UAL), and is the place to find other students and learn new skills.

Cost of study

CCW provides a broad range of resources to support your studies. However, additional costs you may incur whilst studying this unit, depending on personal choice, could include:

- Materials and associated production and finishing costs
- Hiring of additional equipment, venues and other resources
- Printing, framing, installation, binding of work
- Travel and fees associated with trips, visits or location working

You can discuss your choices and likely costs with your Unit Leader prior to starting your work.
Please note that work presented for assessment will be evaluated against unit learning outcomes using UAL's assessment criteria. Increased expenditure on materials to realise your assessment will not equate to increased grades in your assessment.

Additional guidance

General submission information	It is your responsibility to submit your work on time and by the required method, otherwise there may be an impact on your achievement and progression.

Online submission information	If you are submitting work online via Turnitin or Moodle, the Studying Online webpages include useful information on accepted formats, as well as guides to help you in uploading your assignments. You can also contact Digital Learning with queries by raising a ticket with MySupport. Please note that as part of the submission process, the University will utilise Turnitin UK to check the authenticity and originality of your work.

Late Submissions and Failure	If you think you might miss a summative assessment deadline you should discuss this with your Unit Leader/Tutor. You can also find information on the 'Student Guide to Assessment Submissions', located on the UAL Assessment webpage. The UAL Assessment webpage includes details of the university's marking scale and assessment criteria, and what happens if you fail a piece of work. Visit the Course Regulations webpage for information on UAL's framework for the assessment of all taught HE students.

Extenuating Circumstances	Extenuating circumstances are defined as circumstances that are unexpected, significantly disruptive and beyond your control. If you are having difficulties with your assessment you may be able to submit a claim. Further information can be found on the Extenuating Circumstances webpage.

Academic Misconduct	The Academic Misconduct Regulations cover the University's policy and procedures for preventing and addressing cheating and plagiarism.

Referencing	UAL advises that the Harvard Referencing Style is used for all taught courses. Cite Them Right Online is a referencing resource. It will help you to cite and reference just about any source and avoid plagiarism.

Fair assessment	UAL has systems in place to make sure that assessment is conducted fairly for all students. For more information, including the Anonymous Marking Policy, please visit the Fair Assessment webpage.
